### Project Description:

The Ohio Department of Transportation (ODOT) proposes to apply auxiliary and long line pavement markings along various interstate, U.S. and state routes throughout Ashtabula, Mahoning and Trumbull Counties.

On all highways/roadways with 4 or more lanes, a minimum of one eleven-foot lane of traffic in each direction shall be maintained on the existing pavement during pavement marking operations. On highways/roadways with 3 or fewer lanes, a minimum of one ten-foot bidirectional lane will be maintained on the existing pavement during pavement marking operations. Substantial traffic disruptions are not expected during project construction.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project will be constructed within the existing highway/roadway rights-of-way.

Existing utilities within the project study areas will not be impacted/relocated to construct the project.

The project has no Federal funding (100% State funded project) and does not involve a Federal action.

District environmental staff accessed the SHPO GIS database on July 18, 2019. The project is exempt from consultation with the SHPO under Ohio Revised Code (ORC) Section 149.53 and under stipulations found in the revised State Funded Project Agreement (Agreement No. 17075) executed August 29, 2012. The work is an exempted project type and is limited to the installation or maintenance of pavement markings as referenced in Appendix A under Item 6. The project will not impact any historic properties or historic districts.

Based on the information contained in the RMR Form completed for the project, further environmental site assessment or special materials management is not warranted for the project. See the RMR documentation for the project in the Project File/ESA/Reports subsection.

Additionally, this project is considered ecologically exempt under the Ecological MOA (Agreement No. 19394). See the Ecological Review Form - Ecologically Exempt Project.pdf for the project in the Project File/Ecological/Reports subsection.

The project will not impact any environmentally sensitive resources within the project study areas.
