PID:	106307
Project Sponsor:	DISTRICT 4-HMA
ODOT District:	4
Funding Source:	Non-Federal
Does this project require a Federal permit or approval?	No
Private Funding:	No
Project Description:	

The Ohio Department of Transportation (ODOT) proposes raised pavement marker maintenance and replacement along various Interstate, U. S. and State Routes throughout District 4.

On highways/roadways with 4 or more lanes, a minimum of one eleven-foot lane of traffic in each direction shall be maintained on the existing pavement during project construction. On roadways with 3 or less lanes, a minimum of one ten-foot bidirectional lane of traffic shall be maintained on the existing pavement during project construction. Lane restrictions/reductions shall not be permitted after normal working hours. The duration of lane closures/restrictions shall be prescribed by the permitted lane closure chart. Construction and lane restriction/reduction information will be posted within the project construction limits prior to the start of project construction. Access shall be maintained to all adjacent properties, businesses and intersecting side roads during project construction. Substantial traffic disruptions are not expected during project construction. The project will be constructed within the existing highway/roadway rights-of-way.

Existing utilities within the project study areas will not be impacted/relocated to construct the project. Based on the project scope of work, its Path 1 Project Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project has no Federal funding (100% State funded project) and does not involve a Federal action. The project is exempt from consultation with the Ohio State Historic Preservation Office (SHPO)/Ohio History Connection (OHC) under Ohio Revised Code (ORC) Section 149.53 and stipulations in Appendix A of the revised State Funded Project Letter Agreement (Agreement No. 17075), between Ohio's SHPO and ODOT, executed August 29, 2012. The work is an exempted project type and is limited to installation or maintenance of raised pavement markers as referenced in Appendix A under Item 6. This undertaking occurs within existing highway/roadway rights-of-way and, although part of the project is located within the Gustavus and Brookfield Center Historic Districts, will not impact these resources nor any property listed in or eligible for listing in the National Register of Historic Places. See the cultural resources documentation for the project in the Project File/Cultural Resources/Project Information subsection and the Cultural Resources Tab.

Based on the information in the Regulated Materials Review (RMR) Form completed for the project, further RMR activities or special materials management are not warranted for the project. See the RMR documentation for the project in the Project File/ESA/Reports subsection.

Additionally, this project is considered ecologically exempt under the Ecological MOA (Agreement No. 19394). See the Ecologically Exempt D04-RPM-FY2022.pdf for the project in the Project File/Ecological/Reports subsection.

The project is located within 1,000 feet of the following state scenic rivers:

- Pymatuning Creek (1 locations);
- West Branch - Ashtabula River (1 location);
- Ashtabula River (1 location);
- Conneaut Creek (2 locations); and
- Grand River (2 locations).

The project will not impact any of these state scenic rivers. Scenic river coordination was conducted for the project in accordance with the Memorandum of Agreement Between the ODOT and the Ohio Department of Natural Resources (ODNR)/Division of Watercraft For Project Coordination On Ohio's State Wild, Scenic and Recreational Rivers (Agreement No. 11323). See the scenic river coordination documentation for the project in the Project File/Ecological/Coordination subsection as Coordination with ODNR - Scenic River Field Review.pdf.

The work proposed by the project is considered maintenance and, therefore, is exempt from the normal permit process required for work encroaching on a special flood hazard area (SFHA). Floodplain coordination is not required for the project. See the floodplains documentation for the project in the Project File/Permits/Floodplains subsection.

The project will not impact any environmentally sensitive resources within the project study areas.

The environmental document and associated studies, as applicable, were approved using the Stage 3 Design plans for the project. A copy of the Stage 3 Design plans for the project is included in the Project File/General/Project Information subsection as Stage 3 Design.pdf.

The estimated total project cost specified in Ellis agrees with the total project cost specified in the ODOT State Fiscal Years 2021 - 2024 Statewide Transportation Improvement Program (STIP).

STIP Reference #:

106307: 21-24 STIP/SLI Group Project. Fiscal constraint is at SLI Group level.

Cultural Resources Coordination:

ORC 149.53 Appendix A

Cultural Resources Coordination Date:

07/15/2021

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File:

Yes

Select the appropriate project type (more than one can be selected):

(8) Installation of fencing, signs, pavement markings, small passenger shelters, traffic signals, and railroad warning devices where no substantial land acquisition or traffic disruption will occur. *Examples include: The installation or maintenance of signs, pavement markings/raised pavement markers/sensors, traffic calming activities, and/or new or replacement fencing (right-of-way, vandal, etc.); General pavement marking or "line painting" projects.*

(31) Activities that do not utilize federal monies or require federal actions.

Environmental Commitments:

Yes

Environmental Commitments

C1

1) The Project Designer shall incorporate the following note in the plans:

The Contractor shall not discharge toxic or hazardous materials such as sealants, paint, solvents, cleaning agents, earthen materials, waste-water, fuels or debris of any kind to a scenic river, its tributaries, or drainage ways. If refueling of immobile equipment is necessary within the floodplain or near any tributary drainage ways, ditches, or stream, the contractor shall provide secondary containment with enough capacity to completely contain and collect all potential liquid wastes in the event of a spill.

2) The Project Designer shall incorporate the following note to the plans:

Any and all construction debris, earthen debris, excess asphalt or concrete, wood debris from clearing, excess fill material, and trash should be disposed of at an approved upland site or land fill above FEMA 100-year flood elevations. Disposal of any such materials within 1000 feet of the State Scenic Grand River, Ashtabula River, West Branch of the Ashtabula River, Conneaut Creek and Pymatuning Creek is prohibited.

3) The Project Designer shall incorporate the following note to the plans:

In accordance with ORC 3750.06, reportable spills must be reported to the local fire department (911), the local emergency coordinators Mike Fitchet, Ashtabula County EMA Director (440-576-0055) and Linda Beil, Trumbull County EMA Director (330-770-0222) and the Ohio Spill Line (1-800-282-9378).

4) The Project Designer shall incorporate the following note to the plans:

The Contractor shall keep all idle equipment, fuels, lubricants, and any storage for/of potentially toxic or hazardous materials out of the FEMA designated special flood hazard areas and not within 1000 feet of the State Scenic Grand River, Ashtabula River, West Branch of the Ashtabula River, Conneaut Creek and Pymatuning Creek.

5) The Project Designer shall incorporate the following note into the plans:

The Contractor shall notify the Project Engineer 40 days prior to work within 1000 feet of the State Scenic Grand River, Ashtabula River, West Branch of the Ashtabula River, Conneaut Creek and Pymatuning Creek. The Project Engineer shall notify the District Environmental Coordinator 35 days prior to work within 1000 feet of the scenic river. The District Environmental Coordinator shall coordinate with ODNR Scenic Rivers a minimum of 30 days prior to any work within 1000 feet of State Scenic Grand River, Ashtabula River, West Branch of the Ashtabula River, Conneaut Creek and Pymatuning Creek.
