Project Description:

This project is a winter deck patching contract for 5 bridges located within Lucas County. The project will patch and repair the overlays on 5 bridges on an as-needed basis (emergency work orders). All work is within the existing right of way and there will be no impacts to utilities. One of the locations is the I-75 Bridge over the Maumee River which is a Section 9 and Section 10 waterway. Coordination with the US Army Corps of Engineers and Coast Guard is on going. This location is also located within a flood hazard area, however there will be no impacts to the floodplain (documentation in project file). All other locations are over other roadways or railroads. There will be no impacts to any ecological or historical resources. There is no set construction timeframe. If the deck needs patched, the contractor is required to mobilize and patch it, and re-open lane restrictions within 24 hours. There will be no major impacts to traffic.

This document was written and approved based on Stage 3 plans.

Cultural Resources Coordination: Minimal Potential to Cause Effect - Appendix A
Cultural Resources Coordination Date: 08/29/2012
Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(1) Activities which do not involve or lead directly to construction, such as planning and technical studies; grants for training; engineering to define the elements of a proposed action or alternatives so that social, economic, and environmental effects can be assessed; and Federal-aid system revisions which establish classes of highways on the Federal-aid highway system. *Examples include: Study type projects (i.e. feasibility studies, etc.); Land donations to ODOT associated with ROW permits (non-NHS/non-Limited Access right-of-way). (Environmental Site Assessment issues will require coordination with ODOT-OES).*
