Private Funding: No

Project Description:

The Ohio Department of Transportation is proposing to remove, replace, and install new signs on state routes outside of cities and villages in Ottawa, Sandusky and Seneca Counties. No new R/W is required and no utilities will be impacted. There will be no impacts to any waterways so no permits from the US Army Corps of Engineers is required. Some signs will be placed within a special flood hazard area but there will be no impacts to the floodplain. No ecological resources will be impacted by this project and there is a minimum potential to cause effects to historical resources. Construction is expected to begin in the summer of 2019 and last approximately 60 days. During construction, traffic will be maintained by flaggers. Short lane closure will be possible.

This document was written and approved based on stage 2 plans.

(Due to system error/bug, the Stage 2 plans were unable to be uploaded at the time of CE approval. However, once the bug is resolved, they will be uploaded at a later time).
