<b>PID:</b>	109257
<b>Project Sponsor:</b>	DISTRICT 4-HMA
<b>ODOT District:</b>	4
<b>Funding Source:</b>	Non-Federal
<b>Does this project require a Federal permit or approval?</b>	No
<b>Private Funding:</b>	No
<b>Project Description:</b>	

The Ohio Department of Transportation (ODOT) proposes lighting maintenance and repairs with LED upgrades along various interstate, U.S. and state routes throughout Portage, Stark and Summit Counties.

The project will be constructed within the existing highway/roadway rights-of-way.

On two (2) lane roadways, two-way traffic shall be maintained at all times. One (1) lane closures may be permitted on two (2) lane roadways for minimum periods of time with the approval of the project engineer. On highways, the duration of lane closures and restrictions shall be per the permitted lane closure chart. No substantial traffic disruptions are expected with the project.

Existing utilities within the project study areas will not be impacted/relocated to construct the project. Any electric service disconnections and reconnections shall be coordinated with the electric service provider per the project plan.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project has no Federal funding (100% State funded project) and does not involve a Federal action.

The project is exempt from consultation with the SHPO under Ohio Revised Code (ORC) Section 149.53 and under stipulations found in the revised State Funded Project Agreement (Agreement No. 17075) executed August 29, 2012. The work is an exempted project type and is limited to general highway maintenance as referenced in Appendix A under Item 9.

Based on the information contained in the RMR Form prepared for the project, further environmental site assessment or special materials management is not warranted for the project. See the RMR Form for the project in the Project File/ESA/Reports subsection.

Approved: 3/28/2019

This project is considered ecologically exempt under the Ecological MOA (Agreement 19394). See the Ecological Review Form - Ecologically Exempt Project.pdf for the project in the Project File/Ecological/Reports subsection.

The project will not impact any environmentally sensitive resources within the project study areas.

The environmental document and associated studies, as applicable, were approved using the Stage 3 Design plans for the project. A copy of the Stage 3 Design plans for the project is included in the Project File/General/Project Information subsection as Stage 3 Design.pdf.

The estimated total project cost specified in Ellis agrees with the total project funding specified in the ODOT Fiscal Year (FY) 2018 - FY 2021 State Transportation Improvement Program (STIP) Statewide Line Item (SLI) Grouped Project Report as of 03/06/2019.

**STIP Reference #** Statewide Line Item (SLI) Numbers 12 and 32 and is fiscally constrained.  
**Cultural Resources Coordination:** ORC 149.53 Appendix A  
**Cultural Resources Coordination Date:** 03/06/2019

**Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.**

**Supporting documentation has been uploaded to Project File:** Yes

**Select the appropriate project type (more than one can be selected):**

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. **Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)**

(31) Activities that do not utilize federal monies or require federal actions.

**Environmental Commitments:** No
