<b>PID:</b>	110196
<b>Project Sponsor:</b>	STARK COUNTY ENGINEER
<b>ODOT District:</b>	4
<b>Funding Source:</b>	Federal
<b>Private Funding:</b>	No

### Project Description:

The Stark County Engineer (SCE) proposes to mill, repair and resurface Shuffel Street NW/County Road (CR) 230 from approximately Frank Avenue NW to Pittsburg Avenue NW, a distance of approximately 1.02 miles, in Jackson Township, Stark County. This project also proposes full depth pavement repairs, installation of new curb ramps to comply with Americans with Disabilities Act (ADA) standards, installation of new signs and application of new center/stop/crosswalk lines and other pavement markings within the project construction limits.

Mapping that depicts the project on United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Maps is included in Project File/General/Project Information subsection as USGS Quadrangle Topographic Map.pdf.

During project construction, a minimum of one (1) 10-foot lane of traffic will be maintained in each direction on Shuffel Street NW. Construction and lane restriction information will be posted prior to the start of construction. Access shall be maintained to all adjacent properties, businesses and intersecting side streets for the duration of the project. Substantial traffic disruptions are not expected with the project.

The project will be constructed within the existing street right-of-way.

Existing utilities within the project study area will not be impacted/relocated to construct the project.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project is limited to performance of maintenance operations on Shuffel Street NW from approximately Frank Avenue NW to Pittsburg Avenue NW. The entire project area has been previously surveyed to identify eligible resources. No Historic Properties are found in the construction area or area of potential effects (APE) that is limited to the physical construction limits established for the project. Modernization and maintenance projects are generally exempted from further cultural resource consideration by the 11/8/2017 Cultural Resource PA (Agreement 19319) if the project is not within the boundaries of any Historic Property or National Register District. See the cultural resources documentation for the project in the Project File/Cultural Resources section and the Cultural Resources Tab.

Approved: 5/21/2019

A Regulated Materials Review (RMR) form was completed for the project and further environmental site assessment or special material management is not warranted for the project. See the RMR documentation for the project in the Project File/ESA section.

Additionally, this project is considered ecologically exempt under the Ecological MOA (Agreement 19394). See the Ecological Review Form - Ecologically Exempt Project.pdf for the project in the Project File/Ecological/Reports subsection.

The project will not impact any environmentally sensitive resources within the project study area.

The environmental document and associated studies, as applicable, were approved using the preliminary scope of work information for the project uploaded to the Project File/General/Project Information subsection. When available, the project plans will be reviewed by ODOT District 4 Environmental Section personnel and uploaded to the Project File/General/Project Information subsection as Stage 3 Design.pdf.

The estimated total project cost specified in Ellis agrees with the total project cost specified in the Stark County Area Transportation Study (SCATS) Fiscal Year (FY) 2018 - FY 2021 Transportation Improvement Program (TIP) and the Ohio Department of Transportation FY 2018 - FY 2021 State Transportation Improvement Program (STIP) Project Listing (Appendix 6) as of 4/19/2019.

**STIP Reference #** 2018AM11ID0342FDCO and is fiscally constrained.

**Cultural Resources Coordination:** Minimal Potential to Cause Effect Appendix A

**Cultural Resources Coordination Date:** 03/28/2019

**Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.**

**Supporting documentation has been uploaded to Project File:** Yes

**Select the appropriate project type (more than one can be selected):**

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. **Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated**
