Project Description:

This paving project improves SR-108, from the Putnam County line to the Holgate South Corp line. Through removing the existing wearing course, performing necessary pavement repairs, resurfacing, and replacing guardrail. All work is within the existing right of way and there will be no impacts to utilities. There are no jurisdictional water resources in the project area so no USACE permits are required. This project is not located within a special flood hazard area so there will be no impacts to the floodplain. There is no suitable habitat for any state or federally listed species within the project area so there will be no impacts to any ecological resources. The work included in this project has minimal potential to cause effects to historical resources. Construction is expected to begin summer of 2020 and last approximately 90 days. During construction, the road will be closed to perform milling and pavement repairs, top course will be done with flaggers. All impacted property owners, schools, and emergency personnel have been notified.

This document was written and approved based on Stage 2 plans.

Cultural Resources Coordination: Minimal Potential to Cause Effect
Appendix A
Cultural Resources Coordination Date: 06/21/2019

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking

Approved: 10/24/2019

facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***

(23) Projects that receive less than \$5,179,656.40 of Federal funds or with a total estimated cost of not more than \$31,077,938.40 and with Federal funds that comprise less than 15 percent of the total estimated project cost ***(each amount adjusted annually by the Secretary to reflect any increases in the Consumer Price Index prepared by the Department of Labor, see www.fhwa.dot.gov or www.fta.dot.gov).***
