ODOT District: 2
Funding Source: Non-Federal
Does this project require a Federal permit or approval? No
Private Funding: No

Project Description:

The Ohio Department of Transportation is proposing an emergency project to replace failing drainage on I-280 in Wood County. There will be no new right of way or impacts to utilities. There are no jurisdictional waterways or floodplains within the project area so no permits are required. There are no ecological or historical resources within the project area so there will be minimal impacts to both. Construction is expected to begin in the fall of 2019 and last approximately 14 days. During construction, a minimum of 1 lane in each direction on I-280 will be maintained at all times. The public will be notified of lane restrictions at least 14 days prior to the start of construction.

This document was written and approved based on Stage 3 plans.

Cultural Resources Coordination: ORC 149.53 Appendix A
Cultural Resources Coordination Date: 09/03/2019
Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.
Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. **Examples**

Approved: 9/3/2019

include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)
