PID:	106539
Project Sponsor:	Barberton, City of
ODOT District:	4
Funding Source:	Federal
Private Funding:	No

Project Description:

The city of Barberton proposes to resurface 0.22 mile of Wooster Road West and resurface 0.04 mile of Wooster Road North in the city of Barberton, Summit County. This project also proposes to remove the existing westbound outside travel lane along Wooster Road West from 2nd Street NW to Robinson Avenue, construct a new 10-foot wide shared use path along the north side of Wooster Road West from 4th Street NW to 2nd Street NW, install storm drains, construct new curbs/pedestrian crosswalks/various-width curb bump-outs/curb ramps to comply with Americans with Disabilities Act (ADA) standards, upgrade existing traffic signals, install new traffic control signs and apply new pavement markings.

Mapping that depicts the project location on United States Geological Survey 7.5-Minute Topographic Quadrangle Mapping is included in the Project File/General/Project Information subsection as USGS Quadrangle Topographical Map.pdf.

The project will be constructed within the existing roadway rights-of-way with the exception of a total of approximately 0.038 acre of temporary right-of-way to be acquired along Wooster Road West to construct the proposed shared use path and traffic signal upgrades. See Plan and Profile Sheet 34 of 72 and Plan and Profile Sheet 35 of 72 of the Stage 2 Design plans in the Project File/General/Project Information subsection as Stage 2 Design.pdf.

Minor relocations of existing utilities within the project study area will be necessary to construct the project. These minor utility relocations will occur within the existing roadway rights-of-way. Utilities will not be permanently removed to construct the project. Coordination with the utility companies affected by the proposed construction activities was conducted for the project during its preliminary engineering phase and will continue during its detailed design phase.

A minimum of one (1) ten-foot lane of traffic in each direction shall be maintained on the existing pavement or completed pavement during project construction. Access shall be maintained to all adjacent properties, businesses and intersecting side streets for the duration of the project. Lane restriction/reduction information will be posted within the project construction limits prior to the start of project construction. Substantial traffic disruptions are not expected to construct the project.

Approved: 9/24/2020

A Cultural Resources Records Check was performed by district environmental staff using the SHPO GIS online database. No Cultural Resources listed on or determined eligible for listing on the National Register of Historic Places were identified within and/or immediately adjacent to the proposed project area. The undertaking is a type that has minimal potential to cause effects to historic properties. No further coordination is required in accordance with the Section 106 Programmatic Agreement. In accordance with Stipulation V(C)(1) and Appendix A of the Section 106 Programmatic Agreement executed on November 8, 2017 (Agreement No. 19319), amended on July 11, 2019, ODOT determined the project is a type of undertaking that has 'minimal potential to cause effects' to historic properties and is not a part of a larger undertaking. See the cultural resources documentation for the project in the Project File/Cultural Resources/Project Information subsection and the Cultural Resources Tab.

Based on the information in the Regulated Materials Review (RMR) Form completed for the project, further RMR activities are not warranted for the project. However, special materials management is warranted to address potential petroleum contaminated soils at two (2) properties, ODOT/RMR Property ID# RMR-004, 520 Wooster Road West, and ODOT/RMR Property ID# RMR-013, 500 West Tuscarawas Avenue, within the project study area. Petroleum contaminated soils plan notes will be developed for the above properties and incorporated into the project construction plans for adherence during project construction. See the RMR documentation for the project in the Project File/ESA/Reports subsection.

See continuation of the project description in the Project File/General/Project Information subsection as Project Description Continued.pdf.

STIP Reference # 106539: 21-24 STIP/SLI Group Project. Fiscal constraint is at SLI Group level.

Cultural Resources Coordination: Minimal Potential to Cause Effect Appendix A

Cultural Resources Coordination Date: 06/19/2020

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(23) Projects that receive less than \$5,179,656.40 of Federal funds or with a total estimated cost of not more than \$31,077,938.40 and with Federal funds that comprise less than 15 percent of the total estimated project cost (*each amount adjusted annually by the Secretary to reflect any increases in the Consumer Price Index prepared by the Department of Labor, see www.fhwa.dot.gov or www.fta.dot.gov*).
