Project Description:

The Ohio Department of Transportation District 2 is proposing to apply a double micro-surface course on 3 interstate locations in Lucas County and the Van Tassel Maumee River Access parking lot in Wood County. All work is within the right of way and there will be no impact to utilities. There is no work within any waters of the state or the US and there are no floodplain impacts so no USACE permits will be required. There will be no impacts to any state or federally listed species or their habitat. This project also has a minimal potential to cause affects to any historical resources. Construction is expected to begin in autumn of 2021 and last approximately 30 days.

STIP Reference #: 21-24 STIP
Cultural Resources Coordination: Minimal Potential to Cause Effect
Appendix A
Cultural Resources Coordination Date: 11/06/2020

Since no Tribe was interested in this project based on their customized preferences, no furtl
Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. **Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within**

Approved: 3/3/2021

existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)

(23) Projects that receive federal funds that are less than the monetary values indicated by FHWA. These monetary values are adjusted annually by the Secretary to reflect any increases in the Consumer Price Index prepared by the Department of Labor (see www.fhwa.dot.gov or www.fta.dot.gov). See the Help Tip Box for current monetary limits.

Environmental Commitments:

Yes

Environmental Commitments

C1

1) Do not place any temporary or permanent fill within the Maumee River during construction of this project. If debris enters the waterway during construction, remove the debris immediately using equipment staged outside the jurisdictional boundary.
