Project Sponsor: DISTRICT 4-PLANNING
ODOT District: 4
Funding Source: Federal
Private Funding: No

Project Description:

The Ohio Department of Transportation (ODOT) proposes full-depth concrete pavement repairs along Interstate Route (IR) 76 and IR 80 in Jackson and Austintown Townships, Mahoning County, as follows:

- IR 76 from east of State Route (SR) 534 to the Ohio Turnpike/IR 80 interchange, Straight Line Mile (SLM) 3.53 to SLM 8.95 eastbound and westbound, in Jackson Township; and
- IR 80 from the Ohio Turnpike/IR 80/IR 76 interchange to the IR 80/SR 11/IR 680 interchange, SLM 0.00 to SLM 5.02 eastbound and westbound, in Jackson and Austintown Townships.

Additional improvements proposed by this project include minor drainage improvements, raised pavement marker replacement and edge line/lane line/other pavement marking applications.

Mapping that depicts the project location on United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Mapping is included in Project File/General/Project Information as USGS Quadrangle Topographical Map.pdf.

On highways with 3 or more lanes, a minimum of one ten-foot lane of traffic in each direction shall be maintained on the existing pavement and completed pavement during project construction. The duration of lane closures/restrictions shall be prescribed by the permitted lane closure chart. Construction and lane restriction/reduction information will be posted within the project construction limits prior to the start of project construction. Lane restrictions/reductions shall not be permitted after normal working hours.

Substantial traffic disruptions are not expected during project construction.

The project will be constructed within the existing highway rights-of-way.

Existing utilities within the project study area will not be impacted/relocated to construct the project.

Based on the project scope of work, its Path 1 Project Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

A Cultural Resources Records Check was performed by district environmental staff using the SHPO GIS online database. No Cultural Resources listed on or determined eligible for listing on the National Register of Historic Places were identified within and/or immediately adjacent to the proposed project area. The undertaking is a type that has minimal potential to cause effects to historic properties. No further coordination is required in accordance with the Section 106 Programmatic Agreement. In accordance with Stipulation V(C)(1) and Appendix A of the Section 106 Programmatic Agreement executed on November 8, 2017 (Agreement No. 19319), amended on July 11, 2019, ODOT determined the project is a type of undertaking that has 'minimal potential to cause effects' to historic properties and is not a part of a larger undertaking. See the cultural resources documentation for the project in the Project File/Cultural Resources/Project Information subsection and the Cultural Resources Tab.

Based on the information in the Regulated Materials Review (RMR) Form completed for the project, further RMR activities or special materials management are not warranted for the project. See the RMR

documentation for the project in the Project File/ESA/Reports subsection.

Additionally, this project is considered ecologically exempt under the Ecological MOA (Agreement 19394). See the Ecologically Exempt MAH-76-80-3.53.pdf for the project in the Project File/Ecological/Reports subsection.

Part of the project is located within the Drinking Water Source Protection Area - Inland Surface Water Corridor Management Zone of the Mahoning Valley Sanitary District. An ODOT District 4 e-mail correspondence was sent to the Mahoning Valley Sanitary District concerning the project with a request for comments or concerns. Comments/concerns about the project were not received from the Mahoning Valley Sanitary District. See the drinking water source protection area documentation for the project in the Project File/Other Resources/Drinking Water subsection.

ODOT District 4 Environmental Section personnel reviewed the FEMA FIRM for the project study area and determined part of the project is located within a special flood hazard area (SFHA) Zone AE floodplains. The work proposed by the project is considered maintenance and, therefore, is exempt from the normal permit process required for work encroaching on a SFHA. Floodplain coordination is not required for the project. See the floodplains documentation for the project in the Project File/Permits/Floodplains subsection.

The project will not impact any environmentally sensitive resources within the project study area.

The environmental document and associated studies, as applicable, were approved using the Stage 3 Design plans for the project. A copy of the Stage 3 Design plans for the project is included in the Project File/General/Project Information subsection as Stage 3 Design.pdf.

The estimated total project cost specified in Ellis is 244.3% greater than the total project cost specified in the ODOT State Fiscal Years 2021 - 2024 Statewide Transportation Improvement Program (STIP). However, fiscal constraint is at the Statewide Line Item (SLI) Group level. Therefore, an individual project utilizing a SLI does not require a STIP/TIP amendment.

STIP Reference #: 115092: 21-24 STIP/SLI Group Project. Fiscal constraint is at SLI Group level.

Cultural Resources Coordination: Minimal Potential to Cause Effect Appendix A

Cultural Resources Coordination Date: 06/24/2021

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(8) Installation of fencing, signs, pavement markings, small passenger shelters, traffic signals, and railroad warning devices where no substantial land acquisition or traffic disruption will occur. *Examples include: The installation or maintenance of signs, pavement markings/raised pavement markers/sensors, traffic calming activities, and/or new or replacement fencing (right-of-way, vandal, etc.); General pavement marking or "line painting" projects.*

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges,

culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***

1) The project designer shall incorporate the following note into the plans:

Drinking Water Source Protection Area - Inland Surface Water Corridor Management Zone of the Mahoning Valley Sanitary District is located within the project limits. Use proper containment and diking in refueling areas established for the project. Do not store fuels, toxic/hazardous materials and chemicals near drainage ways, ditches or streams. Maintain a spill kit on-site throughout construction activities. Immediately mitigate any event, such as a spill of fuels, oils or chemicals, that could threaten to contaminate the drinking water supply. Report all spills or events to the Mahoning Valley Sanitary District at 330-652-3614. If the spill is a reportable amount (per Ohio EPA Release Reporting Requirements), contact the Mahoning County Emergency Management at 330-726-4155 or the Ohio EPA Spills Hotline at 800-282-9378 for clean-up of the spill.
