C1

**PID:** 114911

**Project Sponsor:** DISTRICT 2 ENGINEERING

**ODOT District:** 2

**Funding Source:** Non-Federal

**Does this project require a Federal permit or approval?** No

**Project Description:**

The Ohio Department of Transportation is proposing a project for fiscal year 2024 to crack seal various routes throughout District 2. All work is within the existing right of way, and there will be no impact to utilities. Since there is no work within any waters of the US and there are no floodplain impacts, no permits are required. There are some ecological species located within 1 mile of the project sites, but there will be no impacts to any state or federally listed species or their habitat. This project has a minimal potential to cause impacts to any historical resources. Construction is expected to begin in the spring of 2024 and last approximately 60 days. During construction, one lane of traffic will be maintained at all times.

This document was written and approved based on the location list provided by the project manager.

**The next phase of the proposed project is listed on the STIP:** Yes

**Ellis STIP Details**

| Phase | Current STIP Reference |
|-------|------------------------|
| ENV   |                        |
| CO    | 114911: 21-24 STIP     |

**The current cost estimate is in line with existing federal procedures for Ohio STIP Amendments and Administration Modifications:** Yes

**Cultural Resources Coordination:** ORC 149.53 Appendix A

**Cultural Resources Coordination Date:** 05/19/2023

**Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.**

**Supporting documentation has been uploaded to Project File:** Yes

**Select the appropriate project type (more than one can be selected):**

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a

controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***
