PID: 109826
Project Sponsor: DISTRICT 4-PLANNING
ODOT District: 4
Funding Source: Non-Federal
Does this project require a Federal permit or approval? Yes

Project Description:

The Ohio Department of Transportation (ODOT) proposes to apply pavement markings, as necessary, along various interstate, U. S. and state routes throughout Ashtabula, Mahoning and Trumbull Counties.

On highways/roadways with 4 or more lanes, a minimum of one eleven-foot lane of traffic in each direction shall be maintained on the existing pavement during pavement marking operations. On highways/roadways with 3 or fewer lanes, a minimum of one ten-foot bidirectional lane of traffic will be maintained on the existing pavement during pavement marking operations. Shoulders will not be used to maintain traffic. Road closures and detours are not proposed to construct the project. All lane restrictions/reductions shall not be permitted after normal working hours. The duration of lane closures/restrictions shall be prescribed by the permitted lane closure chart. Construction and lane restriction/reduction information will be posted within the project construction limits prior to the start of project construction. Access shall be maintained to all adjacent properties, businesses and intersecting side streets for the duration of the project. Substantial traffic disruptions are not expected during project construction.

The project will be constructed within the existing highway/roadway rights-of-way.

Existing utilities within the project study areas will not be impacted/relocated to construct the project.

Based on the project scope of work, its Path 1 Project Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project has no Federal funding (100% State funded project), however, the project is federalized because the effort involves a limited-access interstate route.

A Cultural Resources Records Check was performed by district environmental staff using the cultural resource layers added in Google Earth to determine if previously recorded cultural resources are located within the project Area of Potential Effects (APE), the footprint of the project. The search concluded that portions of the proposed project are located within the following historic districts, all of which are listed in the National Register of Historic Places (NRHP):

1. Windsor Corners Historic District, on U.S. Route 322 and State Route 534 in Ashtabula County (NRHP#75001318)
2. Gustavus Center Historic District, on State Route 87 and State Route 193 in Trumbull County (NRHP#75001542)
3. Fowler Center Historic District on State Route 305 and State Route 193 in Trumbull County (NRHP#85002921)
4. Brookfield Center Historic District on State Route 7 in Trumbull County (NRHP#85002922)
5. South Main Street Historic District, on State Route 170 in Mahoning County (NRHP#84000136)
6. Mill Creek Park Historic District, on U.S. Route 224 in Mahoning County (NRHP#5000178)

The proposed work taking place within the historic boundaries of the aforementioned NRHP-listed Historic Districts is limited to pavement marking applications along various existing modern asphalt paved routes, therefore, the proposed project will not impact these historic districts or any other historic properties/districts and has minimal potential to cause effects to historic properties.

The proposed activities will be state-funded, however, the project is federalized because the effort involves a limited-access interstate route. The highway changes will require a Federal Highways permit, however, construction efforts will focus on the existing limited access operational right-of-way and no additional right-of-way acquisition is required to construct the project. No buildings will be involved in construction and no relocations will be required by the project. Based on the scope of the project, the results of the Section 106 Records Check and in accordance with Stipulation V(C)(1) and Appendix A of the Section 106

Environmental Document Level: C1

PID 109826 D04 PM FY2024 (East)

Approved: 9/12/2023

Programmatic Agreement executed on June 29, 2023 (Agreement No. 38503), ODOT has determined that the proposed project is a type of undertaking that has 'minimal potential to cause effects' to historic properties and is not a part of a larger undertaking. No further coordination is required in accordance with the Section 106 Programmatic Agreement. See the cultural resources determination for the project in the Cultural Resources Tab.

Based on the information in the Regulated Materials Review (RMR) Form completed for the project, further RMR activities or special materials management are not warranted for the project. See the RMR documentation for the project in the Project File/ESA/Reports subsection.

Additionally, this project is considered ecologically exempt under the Ecological MOA (Agreement 19394). See the *Ecologically Exempt D04-PM-FY2024 (East).pdf* for the project in the Project File/Ecological/Reports subsection.

The project is located within the 1,000-foot buffer of the State Scenic Ashtabula River, Grand River, East Branch-Ashtabula River, Conneaut Creek, West Branch-Ashtabula River and Pymatuning Creek. The project will not impact these state scenic rivers. Scenic river coordination was conducted, as appropriate, for the project in accordance with the Memorandum of Agreement Between the ODOT and the Ohio Department of Natural Resources (ODNR)/Division of Watercraft For Project Coordination On Ohio's State Wild, Scenic and Recreational Rivers (Agreement No. 11323). See the scenic river coordination documentation for the project in the Project File/Ecological/Coordination subsection as *Coordination with ODNR - Scenic River Field Review.pdf*.

The work proposed by the project is considered roadway maintenance that will not impact any base flood elevations and, therefore, is exempt from the normal permit process required for work encroaching on a special flood hazard area (SFHA). Floodplain coordination is not required for the project. See the floodplains documentation for the project in the Project File/Permits/Floodplains subsection.

The project will not impact any environmentally sensitive resources within the project study areas.

The environmental document and associated studies, as applicable, were approved using the Stage 3 Design plans for the project. A copy of the Stage 3 Design plans for the project is included in the Project File/General/Project Information subsection as *Stage 3 Design.pdf*.

The estimated total project cost specified in Ellis is 54.85% greater than the total project cost specified in the ODOT State Fiscal Years 2024 - 2027 Statewide Transportation Improvement Program (STIP). However, fiscal constraint is at the Statewide Line Item (SLI) Group level. Therefore, an individual project utilizing a SLI does not require a STIP/TIP amendment.

The next phase of the proposed project is listed on the STIP: Yes

Ellis STIP Details

Phase	Current STIP Reference
ENV	On Previous STIP
CO	109826: 24-27 STIP
DD	On Previous STIP

The current cost estimate is in line with existing federal procedures for Ohio STIP Amendments and Administration Modifications: Yes

Cultural Resources Coordination: Minimal Potential to Cause Effect Appendix A

Cultural Resources Coordination Date: 09/12/2023

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(8) Installation of fencing, signs, pavement markings, small passenger shelters, traffic signals, and railroad warning devices where no substantial land acquisition or traffic disruption will occur. *Examples include: The*

installation or maintenance of signs, pavement markings/raised pavement markers/sensors, traffic calming activities, and/or new or replacement fencing (right-of-way, vandal, etc.); General pavement marking or "line painting" projects.

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***

Environmental Commitments:

Yes

Environmental Commitments

C1

- 1) The Project Designer shall incorporate the following note in the plans: The Contractor shall not discharge toxic or hazardous materials such as sealants, paint, solvents, cleaning agents, earthen materials, waste-water, fuels or debris of any kind to a scenic river, its tributaries, or drainage ways. If refueling of immobile equipment is necessary within the floodplain or near any tributary drainage ways, ditches, or stream, the contractor shall provide secondary containment with enough capacity to completely contain and collect all potential liquid wastes in the event of a spill.
- 2) The Project Designer shall incorporate the following note in the plans: Any and all construction debris, earthen debris, excess asphalt or concrete, wood debris from clearing, excess fill material, and trash should be disposed of at an approved upland site or land fill above FEMA 100-year flood elevations. Disposal of any such materials within 1000 feet of the State Scenic Ashtabula River, Conneaut Creek, East Branch - Ashtabula River, Grand River, West Branch-Ashtabula River and Pymatuning Creek is prohibited.
- 3) The Project Designer shall incorporate the following note in the plans: In accordance with ORC 3750.06, reportable spills must be reported to the local fire department (911), the local emergency coordinator Mike Fitchet, Ashtabula County EMA Director (440-576-3500), Andy Frost, Mahoning County EMA Director (330) 550-6481, John Hickey, Trumbull County EMA Director (330) 770-0222 and the Ohio Spill Line (1-800-282-9378).
- 4) The Project Designer shall incorporate the following note in the plans: The Contractor shall keep all idle equipment, fuels, lubricants, and any storage for/of potentially toxic or hazardous materials out of the FEMA designated special flood hazard area and not within 1000 feet of the State Scenic Ashtabula River, Conneaut Creek, East Branch - Ashtabula River, Grand River, West Branch-Ashtabula River and Pymatuning Creek
- 5) The Project Designer shall incorporate the following note into the plans: The Contractor shall notify the Project Engineer 40 days prior to work within 1000 feet of the State Scenic Ashtabula River, Conneaut Creek, East Branch - Ashtabula River, Grand River, West Branch-Ashtabula River and Pymatuning Creek. The Project Engineer shall notify the District Environmental Coordinator 35 days prior to work within 1000 feet of the scenic river. The District Environmental Coordinator shall coordinate with ODNR Scenic Rivers a minimum of 15 days prior to any work within 1000 feet of State Scenic Ashtabula River, Conneaut Creek, East Branch - Ashtabula River, Grand River, West Branch-Ashtabula River and Pymatuning Creek.
