<b>PID:</b>	116929
<b>Project Sponsor:</b>	Hudson, City of
<b>ODOT District:</b>	4
<b>Funding Source:</b>	Federal
<b>Project Description:</b>	

**Environmental Document Level: C1**  
**PID 116929 SUM SR 91/Terex Rd (Hudson)**

**Approved: 6/23/2025**

The city of Hudson proposes traffic and safety improvements on approximately one quarter mile of Terex Road in a commercial area of Hudson in Summit County. The project limits on Terex Road are from the Hudson Drive intersection to just east of the State Route (SR) 91/Darrow Road intersection.

The proposed improvements include pavement widening and striping modifications to improve left turn lane offsets on Terex Road to improve sight lines. Also, the eastbound left turn lane on Terex Road will be extended to better accommodate school bus and truck stacking. A new westbound left turn lane on Terex Road will be added at a JoAnn Fabrics Stores Support Center driveway. Other improvements proposed by the project include pavement resurfacing, aggregate/paved shoulder maintenance, drainage system improvements, driveway apron reconstruction, casting removal, curb removal/construction, concrete median construction and pavement markings applications.

Mapping that depicts the project location on a topographic, aerial and county map are included in the Project File/General/Project Information subsection.

Two way traffic will be maintained during project construction. Construction lane restrictions will be posted within the project construction limits prior to the start of and during project construction. Substantial traffic disruptions are not expected during project construction.

Based on the project scope of work, its Path 1 designation and the proposed maintenance of traffic measures, emergency/public services were not notified regarding the project impacts.

The project will be constructed within the existing roadway right-of-way.

Existing utilities within the project study area will not be impacted/relocated to construct the project, except for modifications to storm sewers due to roadway widening.

A Cultural Resources Records Check was performed by ODOT District 4 Environmental Section personnel using the SHPO GIS online database. No Cultural Resources listed on or determined eligible for listing on the National Register of Historic Places were identified within and/or immediately adjacent to the proposed project area. The undertaking is a type that has minimal potential to cause effects to historic properties. No further coordination is required in accordance with the Section 106 Programmatic Agreement. In accordance with Stipulation V(C)(1) and Appendix A of the Section 106 Programmatic Agreement executed on June 29, 2023 (Agreement No. 38503), ODOT determined the project is a type of undertaking that has 'minimal potential to cause effects' to historic properties and is not a part of a larger undertaking. See the cultural resources documentation for the project in the Project File/Cultural Resources/Project Information subsection and the Cultural Resources Tab.

Based on the information in the Regulated Materials Review (RMR) Form completed for the project, further RMR activities or special materials management are not warranted for the project. See the RMR documentation for the project in the Project File/ESA/Reports subsection.

This project is considered ecologically exempt under the Ecological MOA (Agreement 19394). See the ecological documentation for the project in the Project File/Ecological/Reports subsection and the Ecological tab.

ODOT District 4 Environmental Section personnel reviewed the FEMA FIRM mapping for the project study area and found the proposed construction activities are not located within a designated Special Flood Hazard Area (SFHA) floodplain. Floodplain coordination is not required for the project. See the floodplain mapping for the project in the Project File/Permits/Floodplains subsection.

The project will not impact any environmentally sensitive resources within the project study area.

For public outreach, Hudson posted project information with contact information on the city's website. No public comments were received.

The environmental document and associated studies, as applicable, were approved using the Stage 2 Design plans for the project. A copy of the Stage 2 Design plans for the project is included in the Project File/General/Project Information subsection as Stage 2 Design.pdf.

The estimated total project cost specified in Ellis agrees with the total project cost specified in the ODOT State Fiscal Years 2024 - 2027 Statewide Transportation Improvement Program (STIP).

**The next phase of the proposed project is listed on the STIP:**

**Yes**

**Ellis STIP Details**

Phase	Current STIP Reference

CO	116929: 24-27 STIP
DD	

The current cost estimate is in line with existing federal procedures for Ohio STIP Amendments and Administration Modifications: Yes

Cultural Resources Coordination: Minimal Potential to Cause Effect Appendix A

Cultural Resources Coordination Date: 06/12/2025

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(8) Installation of fencing, signs, pavement markings, small passenger shelters, traffic signals, and railroad warning devices where no substantial land acquisition or traffic disruption will occur. *Examples include: The installation or maintenance of signs, pavement markings/raised pavement markers/sensors, traffic calming activities, and/or new or replacement fencing (right-of-way, vandal, etc.); General pavement marking or "line painting" projects.*

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. *Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)*
