C1

PID: 122847
Project Sponsor: Youngstown, City of
ODOT District: 4
Funding Source: Federal

Project Description:

The city of Youngstown proposes pavement planing and resurfacing along 2.41 miles of Wood Street, McGuffey Road, Sheridan Road and Powers Way in the city of Youngstown, Mahoning County.

The proposed pavement maintenance/resurfacing limits are described below.

- Wood Street from Belmont Avenue to Wick Avenue, approximately 0.44 miles.
- McGuffey Road from Jacobs Road to Coitsville Hubbard Road (State Route 616), approximately 1.02 miles.
- Sheridan Road from Midlothian Boulevard (State Route 170) to Powers Way, approximately 0.77 miles.
- Powers Way from Sheridan Road to the existing structure spanning Pine Hollow Creek, approximately 0.18 miles.

Additional improvements proposed by this project include partial/full depth pavement repairs, water and gas valve box/manhole/catch basin/inlet adjustments and/or reconstruction and other miscellaneous drainage improvements, existing walk/curb ramp removal, existing curb ramp reconstruction and new curb ramp installations to comply with the Americans with Disabilities Act (ADA) standards, traffic control sign replacements and the application of edge/center/channelizing/stop/crosswalk/transverse diagonal lines and other pavement markings throughout the newly paved sections of Wood Street, McGuffey Road, Sheridan Road and Powers Way.

Mapping that depicts the project location on United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Mapping is included in the Project File/General/Project Information subsection as *USGS Quadrangle Topographical Map.pdf*.

During project construction, a minimum of one 10-foot lane of traffic shall be maintained on the existing pavement or completed pavement during work hours along Wood Street, McGuffey Road, Sheridan Road and Powers Way. The contractor shall utilize barriers and flaggers to maintain a minimum of one-lane, two direction traffic during work hours. A minimum of one 10-foot lane of traffic in each direction shall be opened upon completion of the work each day. Road closures and detours are not proposed to construct the project. Lane restrictions/reductions shall not be permitted after normal working hours. Construction and lane restriction/reduction information will be posted within the project construction limits prior to the start of project construction. Access shall be maintained to all adjacent properties, businesses and intersecting side streets for the duration of the project. Substantial traffic disruptions are not expected during project construction.

Based on the project scope of work, its Path 1 Project Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project will be constructed within the existing street rights-of-way.

Existing utilities within the project study areas will not be impacted/relocated to construct the project.

A Cultural Resources Records Check was performed using the SHPO GIS online database to determine if previously recorded cultural resources are located within the project Area of Potential Effects (APE), the footprint of the project. The search concluded that the proposed project is located adjacent to the Rayen School (NRHP#74001570) which is listed in the National Register of Historic Places (NRHP) and Saint Columba Cathedral (OHPO#2016MAH37378) which was determined eligible for the NRHP under Criteria A & C. Additional DOE and OHI resources are also located adjacent to the project.

The proposed work taking place is limited to pavement maintenance, curb ramp reconstruction, new curb ramp installations, traffic control sign replacements and pavement marking applications where no new permanent right-of-way will be acquired, and no contributing components (including slate/stone sidewalk) will be removed or altered by the project at the aforementioned locations. No buildings will be involved in construction and no relocations will be required by the project. Therefore, in accordance with Stipulation V(C)(1) and Appendix A of the Section 106 Programmatic Agreement executed June 29, 2023 (*Agreement No. 38503*), the MAH-Wood/McGuffey/Powers; PID 122847 project has 'Minimal Potential to Cause Effects' to Historic Properties and is not part of a larger undertaking. No further coordination is required in accordance with the Section 106 Programmatic Agreement. See

Environmental Document Level: C1
PID 122847 MAH Wood/McGuffey/Powers (Ytown)

Approved: 6/12/2025

the cultural resources documentation for the project in the Project File/Cultural Resources/Coordination subsection and Cultural Resources Tab.

Based on the information in the Regulated Materials Review (RMR) Form completed for the project, further RMR activities or special materials management are not warranted for the project. See the RMR documentation for the project in the Project File/ESA/Reports subsection.

Additionally, this project is considered ecologically exempt under the Ecological MOA (Agreement 19394). See the *Ecologically Exempt MAH-Wood McGuffey Powers.pdf* for the project in the Project File/Ecological/Reports subsection.

ODOT District 4 Environmental Section personnel reviewed the FEMA FIRM for the project study areas and determined the project is not located within a special flood hazard area. See the floodplains documentation for the project in the Project File/Permits/Floodplains subsection.

The project will not impact any environmentally sensitive resources within the project study areas.

The environmental document and associated studies, as applicable, were approved using the Stage 3 Design plans for the project. A copy of the Stage 3 Design plans for the project is included in the Project File/General/Project Information subsection as *Stage 3 Design.pdf*.

The estimated total project cost specified in Ellis agrees with the total project cost specified in the ODOT State Fiscal Years 2024 - 2027 Statewide Transportation Improvement Program (STIP).

The next phase of the proposed project is listed on the STIP: Yes

Ellis STIP Details

Phase	Current STIP Reference
CO	122847: 24-27 STIP

The current cost estimate is in line with existing federal procedures for Ohio STIP Amendments and Administration Modifications: Yes

Cultural Resources Coordination: Minimal Potential to Cause Effect
Appendix A

Cultural Resources Coordination Date: 06/12/2025

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(3) Construction of bicycle and pedestrian lanes, paths, and facilities. *Examples include: Walkways, sidewalks, shared-use paths, and facilities, small passenger shelters, (i.e. construction of a bike path on an existing railroad bed, designations of certain highways as bike routes, painting of existing paved shoulders as bike lanes, ADA ramps, etc.) provided that no new disturbance will occur.*

(8) Installation of fencing, signs, pavement markings, small passenger shelters, traffic signals, and railroad

Approved: 6/12/2025

warning devices where no substantial land acquisition or traffic disruption will occur. ***Examples include: The installation or maintenance of signs, pavement markings/raised pavement markers/sensors, traffic calming activities, and/or new or replacement fencing (right-of-way, vandal, etc.); General pavement marking or "line painting" projects.***

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***
