Project Description:

The Ohio Department of Transportation (ODOT) proposes to perform spot pavement repair work apply pavement markings along various Interstate, U.S. and state routes throughout Portage, Stark, and Summit Counties. ODOT certifies that this action meets 23 CFR 771.117(c) and will not result in significant impacts to the environment. This project will not exceed any of the thresholds listed for Certified CEs in the ODOT NEPA Assignment CE Guidance. The project will perform work is proposed within 1,000 feet of the State Scenic Upper Cuyahoga River at State Route 44 between Goodell Road and Canada Road in Shalersville Township, and along State Route 303 from the Streetsboro East Corp Line to Coit Road, also in Shalersville Township. No vegetation removal, ditching, excavation or other environmentally intrusive actions are proposed for the project. No work is proposed below OHWM of the Upper Cuyahoga River and/or any other streams or wetlands. The project will not impact this state scenic river. Scenic river coordination was conducted for the project in accordance with the Memorandum of Agreement Between the ODOT and the Ohio Department of Natural Resources (ODNR)/Division of Watercraft For Project Coordination On Ohio's State Wild, Scenic and Recreational Rivers (Agreement No. 11323). See the scenic river coordination documentation for the project in the Project File/Ecological/Coordination subsection.

The project will not impact a regulatory floodway or affect the base floodplain (100-year flood) elevations of any water course or lake.

The next phase of the proposed project is listed on the STIP: Yes

(8) Installation of fencing, signs, pavement markings, small passenger shelters, traffic signals, and railroad warning devices where no substantial land acquisition or traffic disruption will occur. *Examples include: The*

installation or maintenance of signs, pavement markings/raised pavement markers/sensors, traffic calming activities, and/or new or replacement fencing (right-of-way, vandal, etc.); General pavement marking or "line painting" projects.

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***
