Project Sponsor Trumbull County Engineer
ODOT District 4
Funding Source Federal

Project Description:

The Trumbull County Engineer (TCE) proposes to mill and resurface 1.45 miles of Logangate (CR 1088) from Logan Way (CR 41) to U.S. Route 62 (Hubbard Road) in Liberty Township, Trumbull County.

Additional improvements proposed by this project include partial-depth pavement repairs, linear grading, replacement of Type 5 guardrail and anchor end terminal assemblies, new barrier reflector installations, catch basin adjustments, new stop-line radar detection units, and the application of pavement markings throughout the newly paved section of Logangate Road.

The Ohio Department of Transportation (ODOT) certifies that this action meets 23 CFR 771.117(c) and will not result in significant impacts to the environment. This project will not exceed any of the thresholds listed for Certified CEs in the ODOT NEPA Assignment CE Guidance.

The next phase of the proposed project is listed on the STIP: Yes

The current cost estimate is in line with existing federal procedures for Ohio STIP Amendments and Administration Modifications: Yes

Cultural Resources Coordination: Minimal Potential to Cause Effect
Appendix A

Cultural Resources Coordination Date: 01/28/2026

Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.

Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(8) Installation of fencing, signs, pavement markings, small passenger shelters, traffic signals, and railroad warning devices where no substantial land acquisition or traffic disruption will occur. *Examples include: The installation or maintenance of signs, pavement markings/raised pavement markers/sensors, traffic calming activities, and/or new or replacement fencing (right-of-way, vandal, etc.); General pavement marking or "line painting" projects.*

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***
