**C1**

**PID:** 99892  
**Project Sponsor:** North Canton, city of  
**ODOT District:** 4  
**Funding Source:** Federal  
**Private Funding:** No

**Project Description:**

The city of North Canton proposes to resurface 0.77 mile of Portage Street from approximately Wise Avenue (city of North Canton west corporation limit) to the Willaman Avenue/Charlotte Street intersection and approximately 0.26 mile of Charlotte Street from the Willaman Avenue/Charlotte Street intersection to North Main Street in the city of North Canton, Stark County, Ohio. This project also proposes to mill/full depth repair the existing pavement, adjust existing the catch basins/manholes, install new curb ramps in compliance with Americans with Disabilities Act (ADA) standards, apply new center/edge/stop/crosswalk/other pavement markings and install new traffic signs within the project construction limits.

Mapping that depicts the project on United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Maps is included in the Project File/General/Project Information subsection as USGS Quadrangle Topographical Map.pdf.

The project will be constructed within the existing street rights-of-way.

During project construction, a minimum of one (1) 10-foot lane of traffic will be maintained in each direction along the existing and completed Portage Street/Charlotte Street pavements. Construction and lane restriction information will be posted prior to the start of construction. Access shall be maintained to all adjacent properties, businesses and intersecting side streets for the duration of the project. Substantial traffic disruptions are not expected with the project.

Existing utilities within the project study areas will not be impacted/relocated to construct the project.

The area of potential effects (APE) for the project is limited to the physical construction limits of the project. Modernization and maintenance projects are generally exempted from further cultural resource consideration by the 11/8/2017 Cultural Resource PA (Agreement 19319) if the project is not within the boundaries of any Historic Property or National Register District. See the cultural resources documentation for the project in the Project File/Cultural Resources subsection and the Cultural Resources Tab.

Based on the information contained in the RMR Form completed for the project, the project is exempted from further evaluation and special materials management is not warranted for the project. See the RMR documentation for the project in the Project File/ESA/Reports subsection.

**Environmental Document Level: C1**  
PID 99892 STA Portage St Resurfacing

Approved: 1/6/2020

Moreover, this project is considered ecologically exempt under the Ecological MOA (Agreement 19394). See the Ecological Review Form - Ecologically Exempt Project.pdf for the project in the Project File/Ecological/Reports subsection.

The project will not impact any environmentally sensitive resources within the project study areas.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The environmental document and associated studies, as applicable, were approved using the Stage 2 Design plans for the project. A copy of the Stage 2 Design plans for the project is included in the Project File/General/Project Information subsection as Stage 2 Design.pdf.

The estimated total project cost specified in Ellis agrees with the total project cost specified in the Stark County Area Transportation Study (SCATS) Fiscal Year (FY) 2018 - FY 2021 Transportation Improvement Program (TIP) and the Ohio Department of Transportation FY 2018 - FY 2021 Statewide Transportation Improvement Program (STIP) Project Listing (Appendix 6) as of 10/25/2019.

**STIP Reference #** 2018AM13ID0435FDCO and is fiscally constrained.

**Cultural Resources Coordination:** Minimal Potential to Cause Effect Appendix A

**Cultural Resources Coordination Date:** 11/04/2019

**Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.**

**Supporting documentation has been uploaded to Project File:** Yes

**Select the appropriate project type (more than one can be selected):**

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. **Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated**
