## C1

**PID:** 103818  
**Project Sponsor:** SUMMIT COUNTY ENGINEER  
**ODOT District:** 4  
**Funding Source:** Federal  
**Private Funding:** No

### **Project Description:**

The Summit County Engineer proposes pavement resurfacing and road base repairs to Portage Lakes Drive for approximately 0.31 mile between Manchester Road (State Route 93) and Cormany Drive in Coventry Township. Other project activities include new storm sewer catch basins, paved shoulder reconstruction, pavement markings, drainage repairs, curbing, guardrail, loop detector replacement, and new driveway approaches.

The project will be constructed within the existing roadway right-of-way.

Portage Lakes Drive is a two-lane road. The project will maintain two-way traffic through the work zone at all times during project construction with the use of appropriate signs and flaggers during active periods of work. Access shall be maintained to all adjacent properties at all times during project construction. Maintenance of traffic information will be posted prior to the start of project construction.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project will not impact any environmentally sensitive resources within the project study area.

Existing utilities within the project study area will not be impacted/relocated to construct the project.

Project information was posted to the ODOT District 4 website. Public involvement documentation for the project is in the Project File/Public Involvement section.

The environmental document and associated studies, as applicable, were approved using the Stage 3 plans for the project. The Stage 3 plans are included in the Project File/General/Project Information subsection as Stage 3 Design.pdf.

The estimated total project cost specified in Ellis is 38.9% greater than the total project cost specified in the Akron Metropolitan Area Transportation Study (AMATS) Fiscal Year (FY) 2018 - FY 2021 Transportation Improvement Program (TIP). However, based on the estimated total project cost being less than \$2,999,999

Approved: 1/3/2019

and the additional project cost not exceeding 50% of the project cost in the TIP, a TIP amendment is not necessary for the project.

**STIP Reference #** 2018stipID0172FDCO and is fiscally constrained.

**Cultural Resources Coordination:** Minimal Potential to Cause Effect Appendix A

**Cultural Resources Coordination Date:** 12/24/2018

**Since no Tribe was interested in this project based on their customized preferences, no further Tribal consultation was conducted.**

**Supporting documentation has been uploaded to Project File:** Yes

**Select the appropriate project type (more than one can be selected):**

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. *Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)*
