**Funding Source:** Federal  
**Private Funding:** No

### Project Description:

The Trumbull County Engineer plans to improve State Road/County Highway (CH) 206 between State Route (SR) 305 and SR 45 in Champion Township, Trumbull County, Ohio. The project proposes to mill and resurface 3.0 miles of State Road from SR 305 to SR 45. Additional improvements include partial-depth pavement repairs, the application of new edge/center/stop/channelizing lines and other pavement markings, guardrail replacement and manhole adjustments, as necessary, within the project limits.

During project construction, a minimum of one 10-foot lane of traffic shall be maintained in each direction on the existing pavement or completed pavement. No substantial traffic disruptions are anticipated with the project.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project will be constructed within the existing roadway right-of-way.

Existing utilities within the project study area will not be impacted/relocated to construct the project.

The project will not impact any environmentally sensitive resources within the project study area.

Stage 3 Plans were utilized to evaluate potential environmental impacts by and obtain NEPA approval for the project. The Stage 3 Plans can be found in the Project File/General/Project Information subsection as Stage 3 Design.pdf.

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***
