Private Funding: No

Project Description:

The Ohio Department of Transportation is proposing to resurface State Route 107 in Williams County from State Route 49 to County Road 10 due to poor pavement conditions. All work is within the existing right of way and there will be no impacts to utilities. There will be no work within any waters of the US so no permits from the US Army Corps of Engineers are required. This project is located in a floodplain, however the district hydraulic engineer has determined that there will be no impacts. There will be no impacts to any ecologically or historically significant resources. Construction is expected to begin in the summer of 2019 and last approximately 120 days. One lane of traffic will be maintained at all times throughout construction.

This document was approved based on Stage 2 plans.

Select the appropriate project type (more than one can be selected):

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. **Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County**

Approved: 2/22/2018

maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)

(23) Projects that receive less than \$5,179,656.40 of Federal funds or with a total estimated cost of not more than \$31,077,938.40 and with Federal funds that comprise less than 15 percent of the total estimated project cost *(each amount adjusted annually by the Secretary to reflect any increases in the Consumer Price Index prepared by the Department of Labor, see www.fhwa.dot.gov or www.fta.dot.gov).*

Environmental Commitments:

Yes

Environmental Commitments

C1

- 1) The contractor shall perform all work within the existing right of way.
- 2) Part 642-58 of the Traffic Engineering Manual shall be placed in the plans by ODOT to ensure compliance with Federal notification requirements.
- 3) The contractor shall take all precautions to prevent any and all material from going off the edge of bridge deck(s) and edge of culvert(s) during all construction operations. The contractor shall immediately remove through non-mechanical means any material that falls into the roadside ditches, streams, wetlands, or other waters. Under no circumstances shall the contractor work in or store equipment and/or materials in any wetlands, streams, or other waters. No work or staging is permitted below the top of bank of any stream and/or within a wetland.
