**C1**

**PID:** 107440  
**Project Sponsor:** DISTRICT 4-HMA  
**ODOT District:** 4  
**Funding Source:** Non-Federal  
**Private Funding:** No

**Project Description:**

The Ohio Department of Transportation (ODOT) proposes traffic signal upgrades/modifications including new vehicular signal heads, radar vehicle detection units, messenger wiring and traffic signal controllers at various locations throughout Ashtabula, Trumbull, Mahoning and Stark Counties.

On two (2) lane roadways and four (4) lane divided/undivided highways, the duration of lane closures and restrictions shall be as per the permitted lane closure chart. No substantial traffic disruptions are anticipated with the project.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project.

The project has no Federal funding (100% State Funded project), does not involve a Federal action and will be constructed within the existing highway/roadway rights-of-way.

Existing utilities within the project study areas will not be impacted/relocated to construct the project.

Based on the project scope of work, there is no potential to cause effects to historic properties. The project will not impact any environmentally sensitive resources within the project study areas.

The environmental document and associated studies, as applicable, were approved using the Stage 3 Design plans for the project. A copy of the Stage 3 Design plans for the project are included in the in the Project File/General/Project Information subsection as Stage 3 Design.pdf.

**STIP Reference #** Statewide Line Item (SLI) Number 15 and is fiscally constrained.

**Cultural Resources Coordination:** Minimal Potential to Cause Effect - Appendix A

**Cultural Resources Coordination Date:** 03/02/2018

**Supporting documentation has been uploaded to Project File:** Yes

PID 107440 D04 TSG FY2018

Approved: 3/5/2018

(21) Release of electronics, photonics, communications, or information processing used singly or in combination, or as components of a fully integrated system, to improve the efficiency or safety of a surface transportation system or to enhance security or passenger convenience. Examples include, but are not limited to, traffic control and detector devices, lane management systems, electronic payment equipment, automatic vehicle locaters, automated passenger counters, computer-aided dispatching systems, radio communications systems, dynamic message signs, and security equipment including surveillance and detection cameras on roadways and in transit facilities and on buses. ***Additional examples include: Replacement of existing or installation of new traffic signals, flashing beacons, railroad warning devices and the installation of ITS system components; Upgrade of existing tower lighting to new technologies that ensure a lesser impact than the current system; Implementation of other new safety or operations technologies (must be approved by OES).***

(31) Activities that do not utilize federal monies or require federal actions.
