Project Sponsor: Twinsburg, City of
ODOT District: 4
Funding Source: Federal
Private Funding: No

Project Description:

The city of Twinsburg proposes to resurface/rehabilitate Ravenna Road between East Idlewood Drive and Richner Court. This project also proposes curb repairs, installation of ADA curb ramps, manhole and catch basin adjustments, loop detector repair and pavement markings.

Based on the project scope of work, its Path 1 Preliminary Development Process (PDP) Classification and the proposed maintenance of traffic measures, emergency/public services contact activities were not conducted for the project. Substantial traffic disruptions are not anticipated with the project.

The project will be constructed within the existing roadway right-of-way. Existing utilities within the project study area will not be impacted/relocated to construct the project.

Based on the proposed scope of work, the project has minimal potential to cause effects on historic properties. The project will not impact any environmentally sensitive resources within the project study area.

The environmental document and associated studies, as applicable, were approved using the final scope of work that includes typical section plans. The typical section plans for the project are included in the project file.

STIP Reference # 2018AM04ID0138FDCO and is fiscally constrained.
Cultural Resources Coordination: Minimal Potential to Cause Effect - Appendix A
Cultural Resources Coordination Date: 04/09/2018
Supporting documentation has been uploaded to Project File: Yes

Select the appropriate project type (more than one can be selected):

(22) Projects, as defined in 23 U.S.C. 101 that would take place entirely within the existing operational right-of-way. Existing operational right-of-way refers to right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. This area includes the features associated with the physical footprint of the transportation facility (including the roadway, bridges, interchanges, culverts, drainage, fixed guideways, mitigation areas, etc.) and other areas maintained for transportation purposes such as clear zone, traffic control signage, landscaping, any rest areas with direct access to a

Approved: 4/10/2018

controlled access highway, areas maintained for safety and security of a transportation facility, parking facilities with direct access to an existing transportation facility, transit power substations, transit venting structures, and transit maintenance facilities. Portions of the right-of-way that have not been disturbed or that are not maintained for transportation purposes are not in the existing operational right-of-way. ***Examples include: Tower lighting within the existing operational right-of-way; Guardrail installation and replacement (including median cable barriers) where roadway ditches and backslopes will not be relocated; Improvements to existing ODOT/County maintenance facilities; Construction of new ODOT/County maintenance facilities within existing operational right-of-way; Environmental mitigation activities within existing operational right-of-way; Work on pedestrian and vehicle transfer structures and associated utilities, buildings, and terminals within existing operational right-of-way; Construction of alternative energy facilities (fuel tank farms, wind turbines, etc.)***
